# KRONOS I3

FLIGHT TERMINATION SYSTEM FOR DJI INSPIRE 3 ✔

The Kronos I3 plug & play FTS, developed for the DJI Inspire 3, prevents the drone fitted with it from leaving its regulation flight envelope by cutting (manually or automatically) the drone's power supply in less than a second.

CERTIFICATIONS

MOC 2511 EASA ✔

Dronavia is the first manufacturer to supply FTS that comply with MoC Light-UAS.2511.01, an essential compliance requirement in the development of a SORA (Special Operations Risk Assessment). This certificate is sufficient to meet the requirements of Part 9.

S1/S2 DGAC ✔

The Kronos Inspire 3 FTS enables your drone to be approved for French S1/S2 scenarios. Coupled with a Kronos parachute recovery system, you can certify your drone for all DGAC scenarios. (S1/S2/S3).

C5 CLASS

The Kronos I3 FTS can be coupled with an parachute recovery system to slow down the fall speed and impact energy of your DJI Inspire 3 drone in the event of a problem. Combined, the two systems form an accessories kit that enables you to obtain Class C5 marking for your drone.

GEOCAGING SOLUTIONS

IN COLLABORATION WITH **THALES**
Building a future we can all trust

Zephyr CC & ScaleFlyt Geocaging module lets you create a virtual cage representing your drone's flight zone. Coupled with a Dronavia flight termination system, this module automatically switches off the engines if the drone's containment is not respected.
